

All in One (AiO) system

Revolution in the sale of protective accessories for any devices.

Increase your sales by NOT increasing your stock.

You can now produce high-quality protective films and personalised cases for your yourself, adapting the quantity and type of products to current demand.

All you need is: an AiO system and 0.42 m² of point-of-sale space.

In addition to equipment, you will receive know-how and ongoing technical support from us.

Meet the **All in One (AiO)** system

The AiO system consists of a plotter with an application for producing screen protection films and a printer for personalised printing of protective cases for smartphones. The devices operate independently of each other.

Explore the AiO personalisation system:

- the plotter with integrated application enables the production of as many as 44,000 combinations of film cut-outs,
- protect any screen regardless of the model of mobile device,
- customer service is available in English and Polish 7 days a week,
- online training in the use of the system,
- only need 0.42 m² of free space to start the business,
- Polish manufacturer,
- plotter and printer software produced in the EU,
- power supply 230V, energy consumption ECO,
- shipping in 24 hours, delivery within 7 working day.

Discover our AiO-compatible protective films
